

## Directions for Use

**1 Scoop = 4 ounces**

**10 POUNDS TREATS APPROXIMATELY 15 ACRES**

### TURF & ORNAMENTAL

#### Application

Apply through standard irrigation or spray applicator at a rate of 1 oz per 1,000 square feet (30 grams per 100 square meters) every 2 to 3 weeks. Dissolve in water before application at a rate of 1 oz per 1-5 gallons of water.

#### Foliar Applications

Apply 8 to 10 oz/Acre (225-300 gms) of SeaMate Fe™ per application with fertilizer using sufficient water (100 gallons) for uniform coverage of the crop. See instructions on this label (Preparing Tank Mix Solutions).

#### STORAGE

This material is hygroscopic. Always replace the lid tightly after use. Store in a dry place in the original container.

Manufactured for and Distributed by:

8144 Walnut Hill Lane, Suite 987 - Dallas, TX 75231  
214-750-4698

**SeaMate Fe**  
**6-8-12™**

An all-purpose Seaweed, Iron, N-P-K and Humic Acid water-soluble powder.

#### GUARANTEED ANALYSIS:

Total Nitrogen (N) ..... 6.0%  
6.0% Urea Nitrogen  
Available Phosphate (P2O5) ..... 8.0%  
Soluble Potash (K2O) ..... 12.0%  
Iron (Fe) ..... 3.0%

Derived from: Potassium Phosphate, Urea, Iron Humate, Seaweed Extract

ALSO CONTAINS NONPLANT FOOD INGREDIENT:  
19% Humic Acids

Derived from: Menefee Humate

F1073

NET WEIGHT

25 LBS / 11.34 KG

Lot No 160111

## PREPARING TANK MIX SOLUTIONS

Thoroughly clean all spray mixing and application equipment prior to and following each use. Unless directed otherwise by mixing instructions on the label of product to be tank mixed with SeaMate Fe™, follow these procedures:

1. Add the desired amount of water to the tank and begin agitation. Add desired spray adjuvant (wetting agent) if the application requires it to be used. SeaMate Fe™ will wet and disperse readily with-out an adjuvant.

2. Drip-irrigation add SeaMate Fe™ at a rate of 10 to 12oz/Acre. Foliar add SeaMate Fe™ at a rate of 8 to 10 oz/Acre.

3. Add liquid fertilizer. Do not tank mix with herbicides. Do not mix SeaMate Fe™ directly with undiluted tank mix partners until you have "jar tested" in a separate container the proportionate amount of SeaMate Fe™ to make sure the products are compatible prior to tank mixing. Agitate and let stand 10 minutes. Settling that does not disperse indicates an incompatible mixture.

4. Continue filling while agitating until all added products are thoroughly mixed into spray solution.

May be harmful if swallowed. May cause irritation of eyes, nose, throat, or skin. Avoid contact with eyes, skin or clothing. In case of contact with eyes, flush with plenty of water. Consult a physician if irritation persists. Notice: May cause staining on handler's apparel. Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with direction under normal conditions of use. Neither this warranty nor any other warranty of merchantability or fitness for a particular use, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such use.
